(54) SEAT ARRANGEMENT STRUCTURE FOR VEHICLE

(57) Abstract

PROBLEM TO BE SOLVED: To provide a seat arrangement structure for a vehicle capable of preventing difficulty of driving by a driver, preventing reduction of sitting comfortableness in case of a small number of occupants, and allowing certain V-shaped layout.

SOLUTION: A first center sheet 16 can be longitudinally slid only in a backward range from positions where front ends of it and a pair of first side seats 11. The pair of first side seats 11 can be longitudinally slid only in a forward range from positions where front ends of the pair of first side seats 11 and the first center sheet 16. The width of the first center sheet 16 is narrower than that of the first side seats 11.
